

Plato: A Service Oriented Decision Support System for Preservation Planning

Christoph Becker, Hannes Kulovits, Andreas Rauber, Hans Hofman
ACM/IEEE Joint Conference on Digital Libraries (JCDL 2008)

Pittsburgh, PA, USA. June 16-20, 2008

- Digital Preservation and Preservation Planning
 - Evaluation of potential actions
- Plato: The Planets Preservation Planning Tool
 - Underlying methodology and workflow
 - Service discovery and integration
 - Characterisation
 - Preservation action
 - State of development and roadmap
- Current and future work

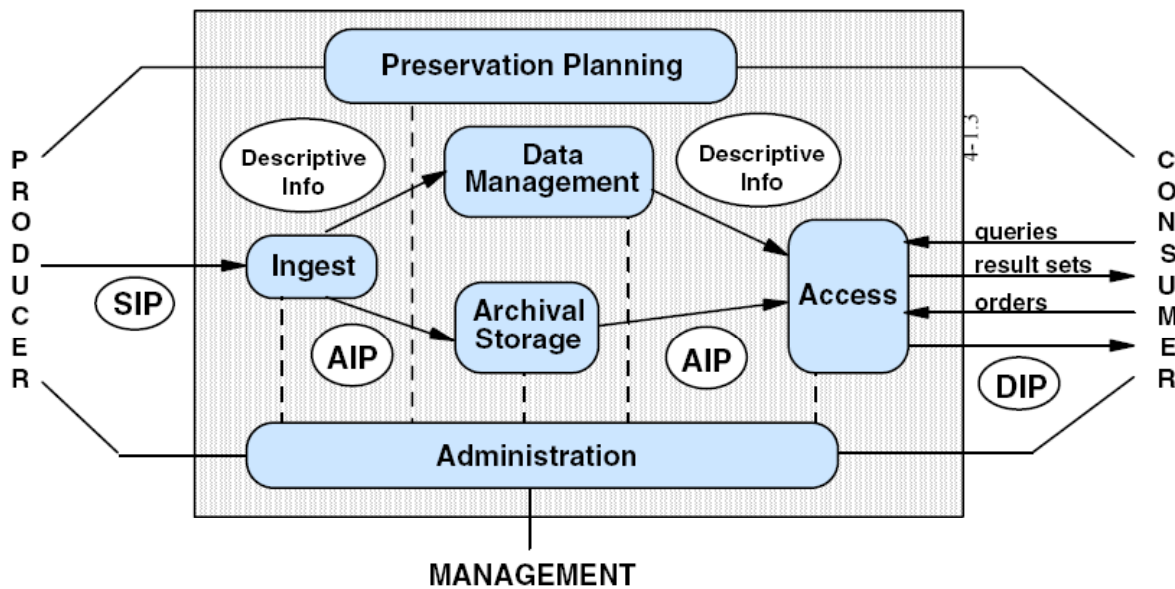

- We create, shape, and exchange information digitally
- Digital objects need technical environment to “function”
- Heterogeneity and complexity of formats and environments and the speed of technological change make long-term access a challenge

- Dominant types of preservation actions:
 - Migration
 - Emulation

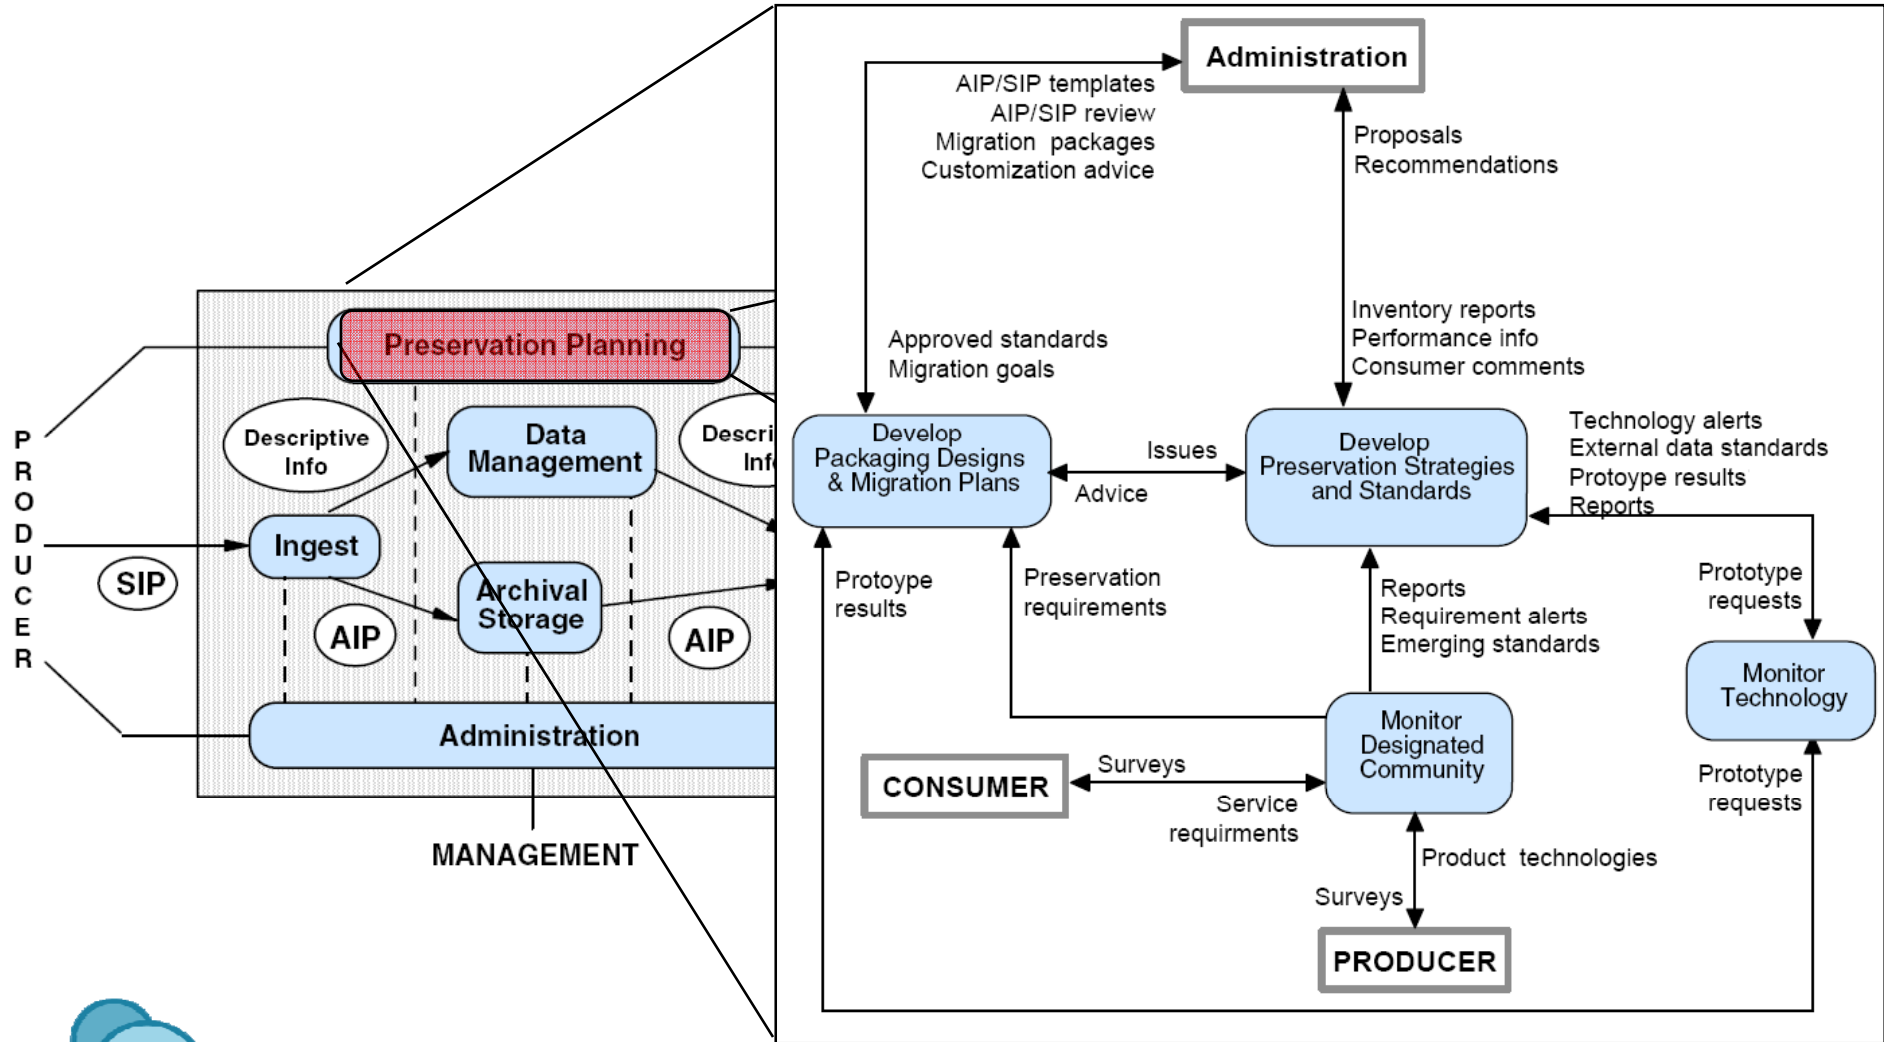

- Variety of solutions and tools exist
- Each strategy has unique strengths and weaknesses
- Requirements vary across settings
- Decision on which solution to adopt is complex
- Documentation and accountability is essential

- Preservation planning assists in decision making
- Evaluating preservation strategies on representative samples according to specific requirements and criteria

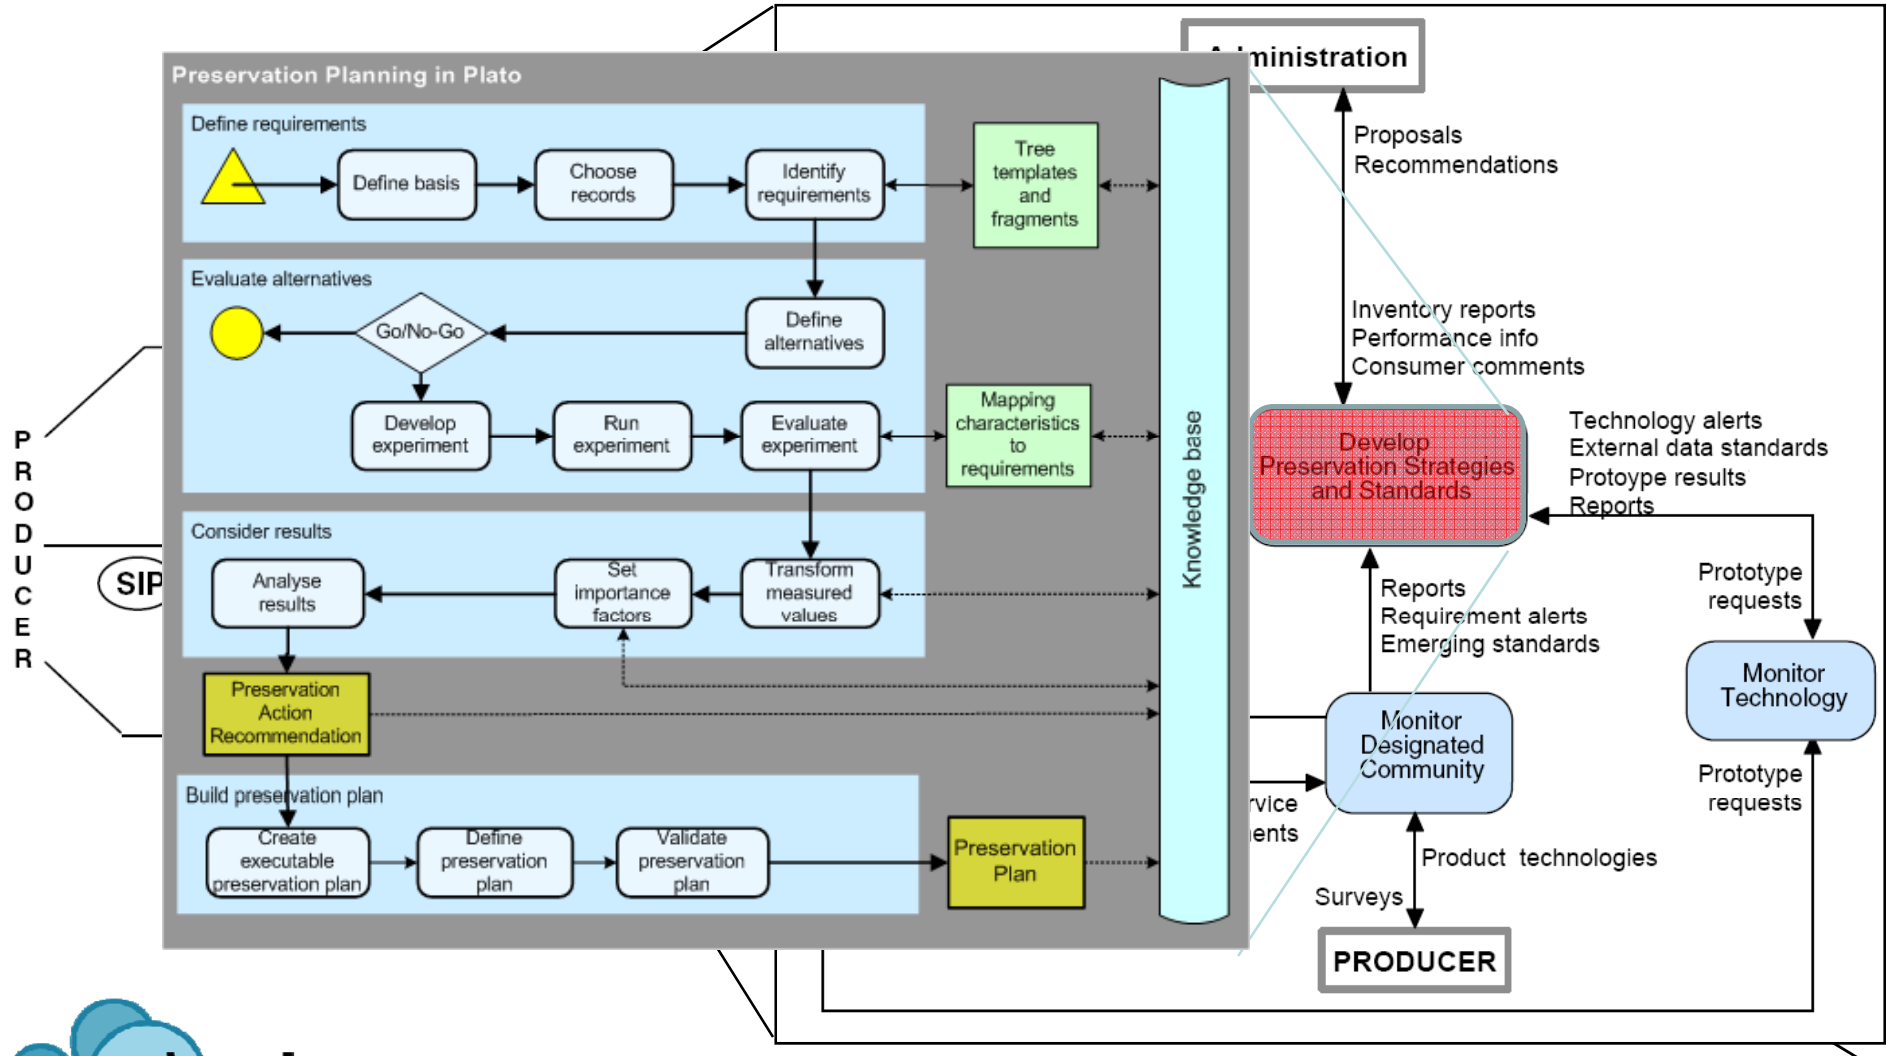

Preservation Planning

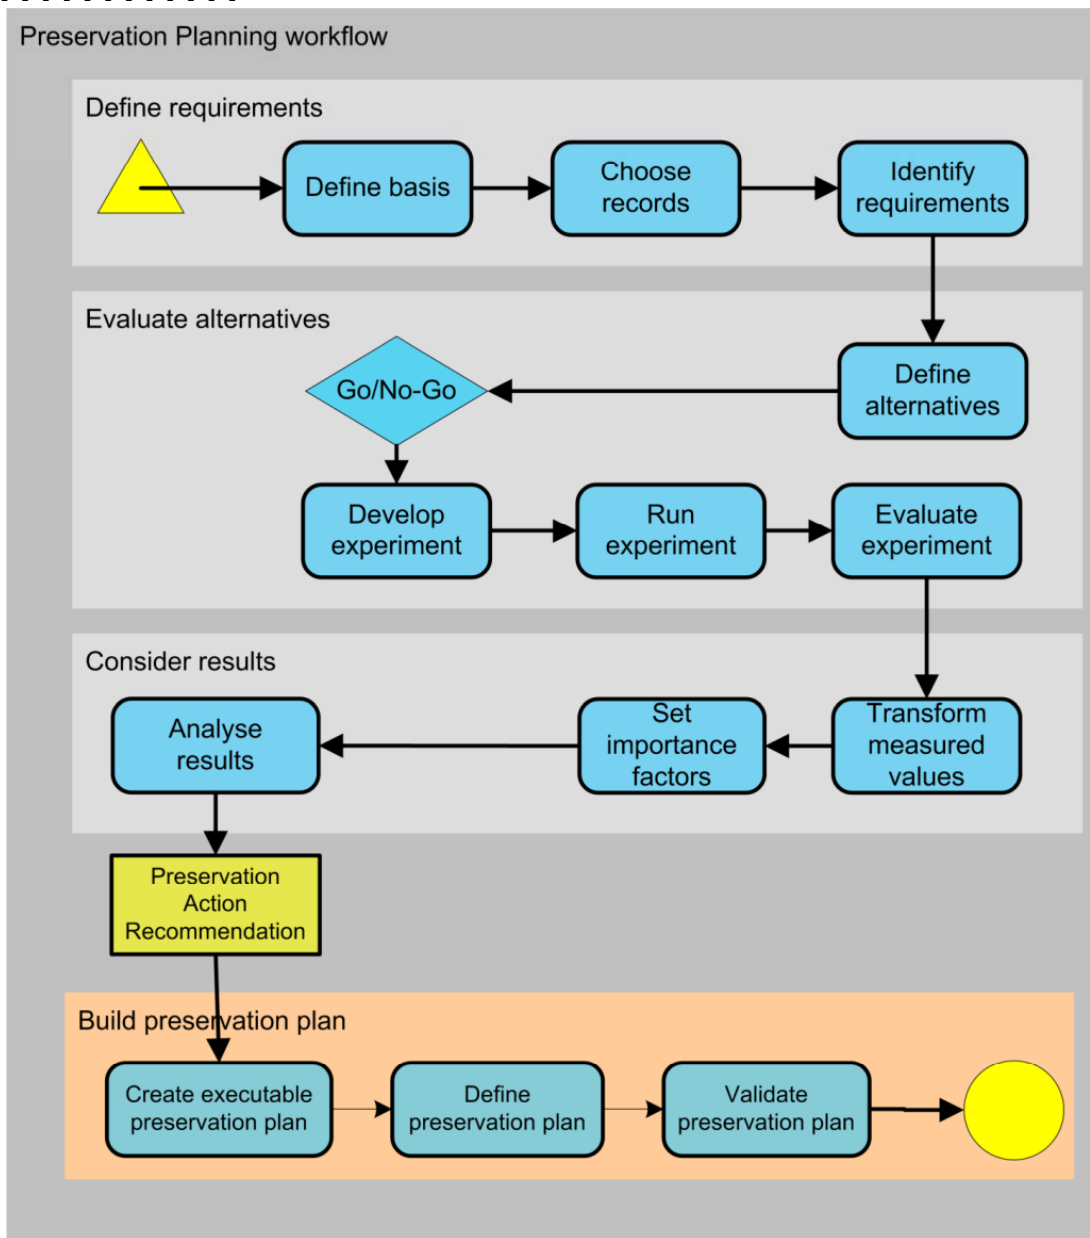

Preservation Planning

Preservation Planning

- ❑ Define requirements
 - ❑ Basis
 - ❑ Sample objects
 - ❑ Requirements
- ❑ Evaluate potential actions
- ❑ Analyse results
- ❑ Build a preservation plan

- Web based planning tool implementing the Planets preservation planning workflow
- Publicly available
- Ongoing development
- Integration of registries and services for
 - File format identification
 - Preservation action
 - Characterisation and comparison
- Frontend to a distributed architecture of preservation services

Format identification

	Preservation Action	Target Format	Info
<input type="checkbox"/>	JPG > BMP	Windows Bitmap, version 3.0	JPG>BMP
<input checked="" type="checkbox"/>	JPG > TIF	Tagged Image File Format, version 3	JPG>BMP>TIF
<input type="checkbox"/>	JPG > TIF #2	Tagged Image File Format, version 3	JPG>TIF
<input checked="" type="checkbox"/>	JPG > TIF_2	Tagged Image File Format, version 3	JPG>TIF_2
<input type="checkbox"/>	JPG > PNG	Portable Network Graphics, version 1.0	JPG>PNG
<input type="checkbox"/>	JPG > JP2	JPEG 2000	JPG>JP2

Create alternatives for selected services

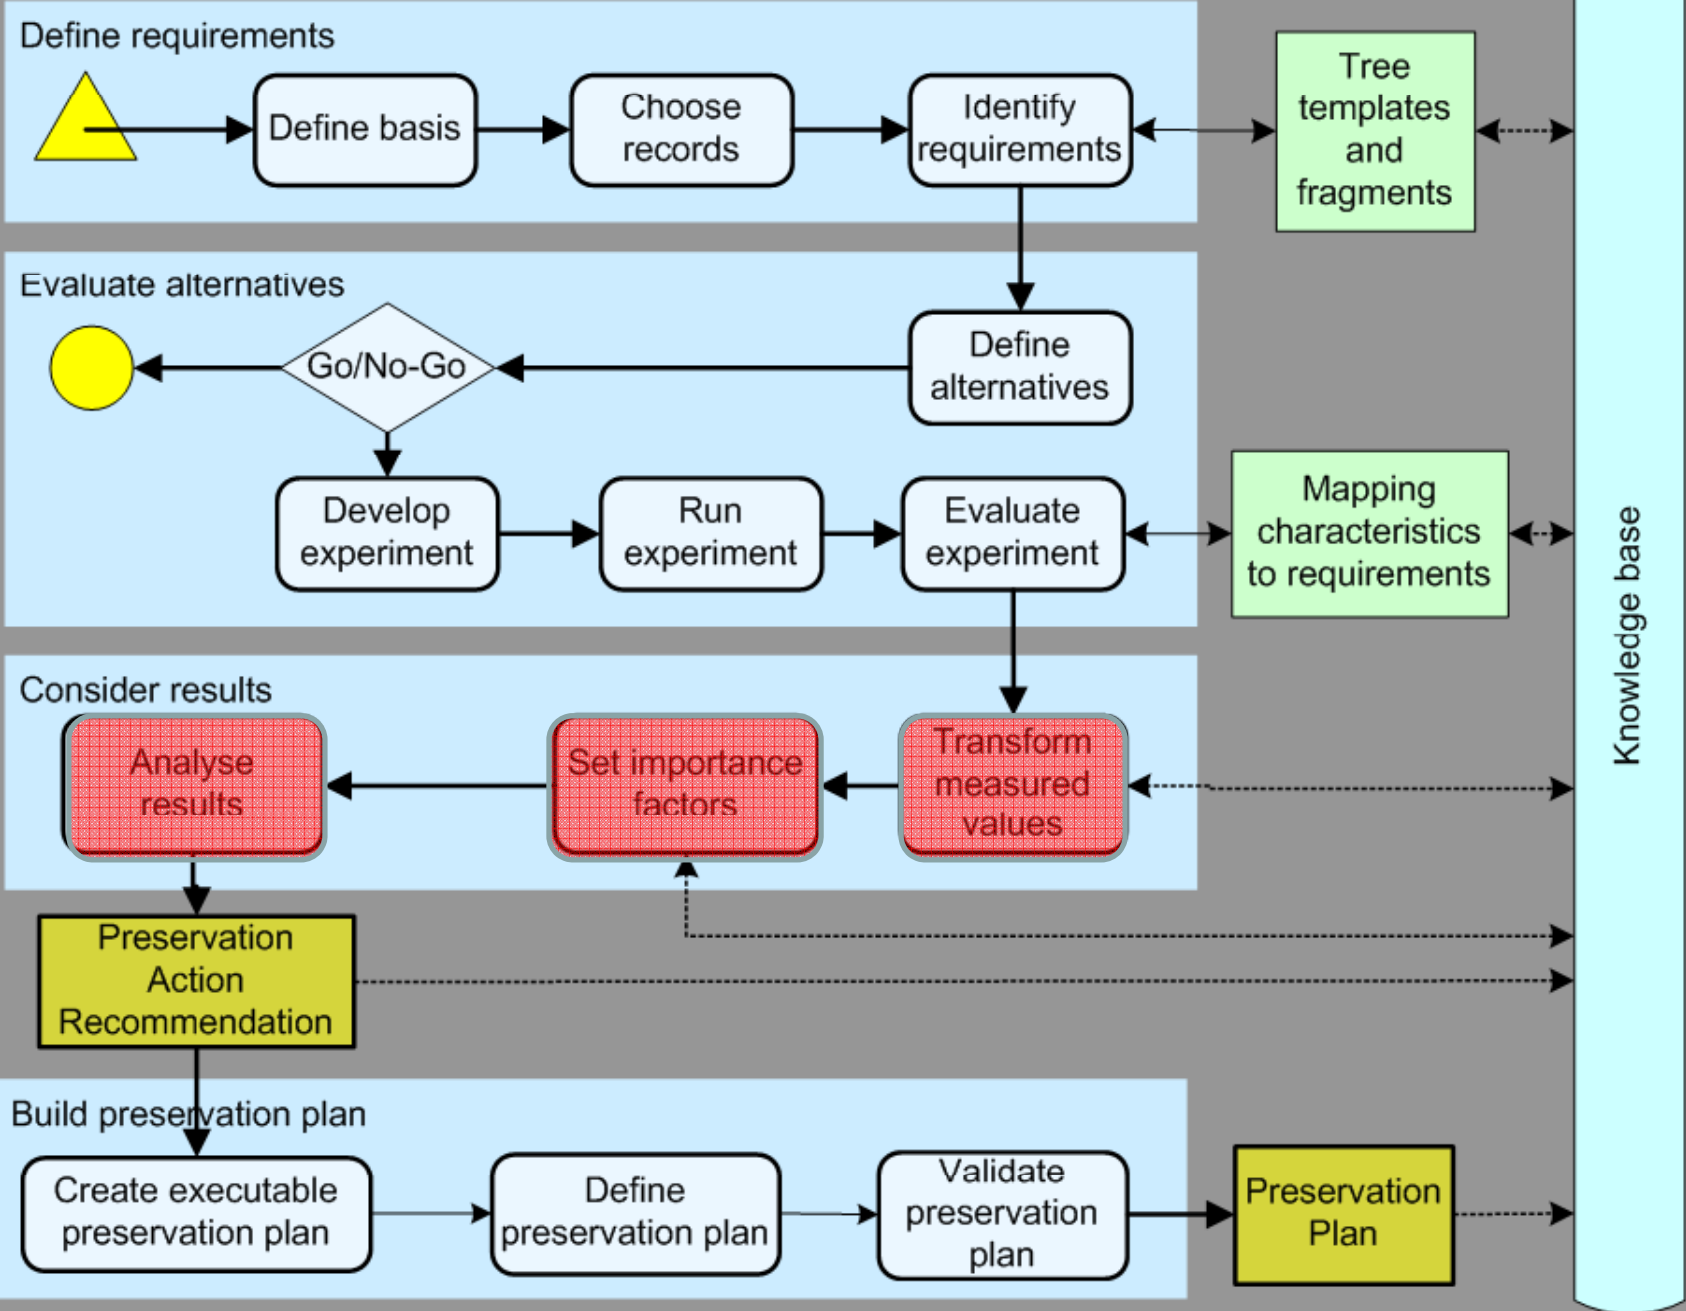

- ❑ Apply actions on sample content
- ❑ Evaluate outcomes

- ❑ Significant properties of objects
 - ❑ Content
 - ❑ Appearance
 - ❑ Structure
 - ❑ Behaviour
 - ❑ Context
- ❑ Image width in Pixel, colour depth in bit...
- ❑ Technical characteristics extracted from objects

Comparing migrated documents

Preservation Planning in Plato

Analyse Results

Aggregation method:

Select	Alternative

Summary

- ❑ Preservation planning in Plato
- ❑ Workflow
- ❑ Characterisation
 - ❑ Format identification
 - ❑ Collection profiling
 - ❑ Risk assessment
 - ❑ XCL and comparison
- ❑ Discovering applicable actions
- ❑ Building a preservation plan

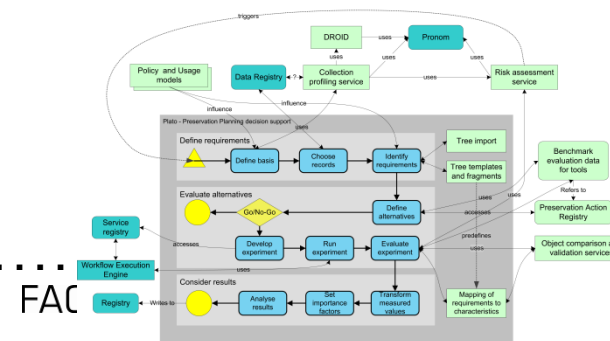

Future work

- ❑ Pluggable infrastructure for the automated evaluation of preservation actions
- ❑ Integrated knowledge base and recommender systems
- ❑ Case studies on electronic documents, image archives, electronic art, computer games...
- ❑ Plato 1.3 in July
- ❑ Plato 2.0 scheduled for October 2008
 - ❑ Service integration
 - ❑ Preservation plan
- ❑ Plato 3.0 early 2010

Integrating Preservation Planning Decision support with Planets components
November 2007
